Photography Black & White - Still Life

Photography Color - Plants and Animals

Photography Color - Character Trait Picture

Photography Color - Special Effects

There are two classifications: Color and Monochromatic (black and white, sepia, and grayscale).

Contestants may enter any of the classifications in the following categories.

Note: Monochromatic (black and white, sepia, and grayscale) Plants and Animals is a combined event, whereas Color Plants and Color Animals are two separate events. Contestants may use any camera for all categories.

1. Scenic - A picturesque outdoor setting.
2. Still Life - A picturesque indoor arrangement of objects.
3. Plants and Animals - A picture of living animals, birds, insects, flowers or plants etc., taken in their natural or unnatural habitat (zoo and botanical gardens pictures are permitted).
4. Special Effects - (color only) TRICK PHOTOGRAPHY using objects, lighting, lenses, or other equipment to create an illusion or unusual effect. Include a detailed description on the Photography Report (CF37) of how you created your special effect. Computer software (Adobe® Photoshop®, Adobe® Illustrator®, CorelDRAW®, etc.) may not be used.

CRITERIA

Meets A.C.E. Guidelines - The subject matter or topic treated must conform to A.C.E. standards of what is acceptable in behavior, dress, etc.

Composition - The visual process of organizing the elements and individual details of a scene into a balanced and pleasing arrangement.

Mounting - The color, texture, and permanence of the material on which the photograph is exhibited.

All entries are to be uploaded to the RSC program and/or to internet resources.

HINTS FROM THE PHOTOGRAPHY JUDGES

Judges will pay close attention to the technical qualities of your work. Next to content comes composition. This includes the number of subjects, their arrangements, and the background of the picture. When composing, keep your photography simple. Too much symbolism or clutter is distracting to the viewer. Avoid placing the main subject "dead center." This produces a dull, static effect, which is not very pleasing to the eye.

After composing the photo, carefully check the background for distracting, objectionable elements. Many fine shots have been ruined by ugly telephone wires or distracting blotches of color that detract from the main subject. Nothing in the photo, even though in the background and out of focus, should violate the A.C.E. standard of dress, behavior, etc. Finally, pay close attention to the finishing touches. Your photo should be clean and free of scratches, dust specks, or wrinkles, and should be matted attractively. Often these are the factors that are used to break ties.
